

CURRENT PROCEDURE

Problem: the provider writes the customer's limits into the application, so the authority reviews mandate content (payment size, monthly ceiling, ...) it has no need to see, and every new customer needs a new review.

PROPOSED PROCEDURE

*Fix: the authority approves the provider and its agent once;
no transaction or mandate (payment size, monthly ceiling, ...)
is reviewed. The registry of passports
lets it reconstruct the path when a bank reports under current law.*
